PROGRAM AT-A-GLANCE

WEDNESDAY, April 26, 2017

7:30 AM – 5:15 PM	REGISTRATION
7:30 AM – 10:00 AM	CONTINENTAL BREAKFAST AND EXHIBIT HALL OPEN
9:00 AM – 9:45 AM	PRODUCT DEMONSTRATION
10:00 AM – 10:25 AM	CONFERENCE OVERVIEW
10:25 AM – 11:20 AM	GENERAL SESSION KEYNOTE Forecasting the future: How to prepare for new value-based models of care from the federal Centers for Medicare and Medicaid Services and SAMHSA
11:20 AM – 12:15 PM	GENERAL SESSION KEYNOTE Improving care coordination between primary and behavioral health care services: Opportunities and challenges
12:15 PM – 2:00 PM	LUNCH, EXHIBIT HALL OPEN

2:00 PM – 3:15 PM	CONCURRENT SESSIONS
	Using data well: How to develop useful reports that can guide quality improvement efforts and management decision making
	The future of managing information related to clients' mental health and substance use treatment in Health Information Exchange (HIE) Organizations
	Collaborative documentation: How to streamline chart documentation and include clients' in the process
	Emerging and ongoing data privacy and security challenges for behavioral health care in the evolving health care system
3:15 PM – 3:45 PM	BREAK AND EXHIBIT HALL OPEN
3:45 PM – 5:00 PM	GENERAL SESSION KEYNOTE Consumer-driven use of technologies to enhance treatment and recovery: Mobile devices and portals to support use of social media, texting, apps, bots and more
5:00 PM – 6:45 PM	EXHIBITOR RECEPTION AND EXHIBIT HALL OPEN

THURSDAY, April 27, 2017

7:30 AM – 3:30 PM	REGISTRATION
7:30 AM – 8:15 AM	CONTINENTAL BREAKFAST AND EXHIBIT HALL OPEN
8:30 AM – 9:40 AM	GENERAL SESSION KEYNOTE SAMHSA enacts the first Revise of 42CFR.2: A look at the new regulations for privacy of substance use treatment data
9:45 AM – 10:45 AM	GENERAL SESSION KEYNOTE Laying the groundwork for electronic consents to release information: Progress towards national standards and technology solutions
10:45 AM – 11:15 AM	BREAK AND EXHIBIT HALL OPEN
11:15 AM – 12:30 PM	CONCURRENT SESSIONS
	Measuring access to care: Challenges for counties and treatment providers in managed systems of care
	Continuum of Care Reform in California: How data sharing between child welfare, behavioral health and physical health care systems supports new treatment models for youth and their families
	The present and future of Clinical Decision Support: Real world examples of automation and alerts to support enhanced patient safety and quality of care
	Year two of California's 1115 Drug Medi-Cal Waiver pilot: How information technology and health information exchange are helping build an organized delivery system for treatment of substance use disorders

12:30 PM – 2:00 PM	LUNCH AND EXHIBIT HALL OPEN
2:00 PM – 3:15 PM	CONCURRENT SESSIONS
	How to decide on what measures of quality care to use: An overview of nationally vetted measures and how to select from them
	Care coordination for clients under civil commitment or otherwise hospitalized for a serious mental illness: Making data exchange easier between behavioral health, public guardian, and other involved services
	Extending the connectivity to EHRs beyond the desktop via mobile and web based technologies
	Substance use instruments for screening, assessment and measuring outcomes: An overview of approaches
3:30 PM	CLOSING GENERAL SESSION California's Medi-Cal Waiver Whole Person Care Initiative: How information technology and HIE are being incentivized to support care coordination

Forecasting the future: How to prepare for new value-based models of care from the federal Centers for Medicare and Medicaid Services and SAMHSA

John O'Brien, Sr. Consultant, Technical Assistance Collaborative; and former Sr. Policy Advisor, Centers for Medicare and Medicaid Services and Sr. Advisor to the Administrator on Health Care Reform, SAMHSA

The federal Centers for Medicare and Medicaid Services and the Substance Abuse and Mental Health Administration continues to evolve healthcare policies for the nation that significantly shape how behavioral healthcare is delivered, coordinated with other services, and reimbursed. This important session will feature a national behavioral health policy expert and former high ranking official from both federal agencies. He will draw upon his knowledge and experience to forecast future directions in national health policies, particularly with reference to their impact on behavioral health care services. He will explain how new value-based payment approaches will shift how care will be reimbursed and what information technology and data supports will become necessary. He will also overview several new federal initiatives to enhance care coordination and integration, and how to prepare your organization and its information management systems for these initiatives and a successful future.

DAY 1

The National Behavioral Health Information Management Conference and Exposition

WEDNESDAY, April 26, 2017

11:20 AM – 12:15 PM

GENERAL SESSION KEYNOTESunset Ballroom A/B

Improving care coordination between primary and behavioral health care services: Opportunities and challenges

Virna Little, PsyD, MBA, Senior Vice President, Psychosocial Services/Community Affairs, The Institute for Family Health

Benjamin Clemens, LCSW, Director of Technology Implementation, The Institute for Family Health

Mental health, substance use and physical health care services are focused increasingly on care coordination between these services for their clients. Presenters in this session will explain the forces driving this focus at the health plan and provider levels and through federal, state and county initiatives. They will describe the challenges of data exchange necessary to facilitate the coordination of care. They will provide case examples of how the data exchange arrangements are being implemented across diverse information technology systems.

12:15 PM – 2:00 PM

LUNCH, EXHIBIT HALL OPENGrand Pacific Ballroom A/B

2:00 PM – 3:15 PM

CONCURRENT SESSIONS

Using data well: How to develop useful reports that can guide quality improvement efforts and management decision making Del Mar

Karin Kalk, MHA, Associate Director, California Institute for Behavioral Health Solutions (CIBHS)

Rikke Addis, MA, Associate, California Institute for Behavioral Health Solutions (CIBHS)

Harry Collamore, LMFT, Quality Coordinator, Napa County

Too much data is being collected without useful purpose other than meeting requirements. Presenters will explain, with the use of case examples, how different types of data can be analyzed and reported in ways that provide useful information for quality improvement and management decision-making. They will explain how payers who require the data can report back the results in formats useful to those who initially collected the data. The presenters will suggest how payers can think through the intended purpose of the required data beforehand, and mobilize resources accordingly to print and communicate results in ways that will achieve the intended purposes. They will include suggestions for how data already being collected might be administered and analyzed in formats that would be more useful to treatment provider programs.

DAY 1

The National Behavioral Health Information Management Conference and Exposition

WEDNESDAY, April 26, 2017

2:00 PM – 3:15 PM

CONCURRENT SESSIONS, Continued

The future of managing information related to clients' mental health and substance use treatment in Health Information Exchange (HIE) Organizations Solana

Robert Cothren, PhD, Executive Director, California Association of Health Information Exchanges

Mark Elson, PhD, Executive Director, San Joaquin Community Health Information Exchange

MODERATOR: Lyman Dennis, MBA, PhD, Executive Director, ConnectHealthcare

An integral component of the Affordable Care Act and the HiTECH Act is Health Information Exchange (HIE) Organizations to provide the foundation for coordinated care. Presenters in this session will explain the basics of how HIEs run, including their business models to sustain their viability and their operations models to both receive and forward client treatment information. The presenters will explain the challenges to incorporating mental health and substance use treatment data given the tighter privacy and security regulations governing those data, and summarize a few strategies in current use to address those challenges.

Collaborative documentation: How to streamline chart documentation and include clients' in the process Cardiff

Benjamin Clemens, LCSW, Director of Technology Implementation, The Institute for Family Health

Rebecca Levy, LMSW, MA, MH Clinician, Director of Intern Program for Psychosocial Services, The Institute for Family Health

MODERATOR: Cheri Silveira Moliere, PMP, CPHIMS, CHSP, CPHP, Xpio Health

Treatment providers in medical settings are already adopting collaborative documentation as a common practice, and uptake is beginning in some behavioral health settings. Presenters will describe how clinicians can enter their progress notes into the electronic health record during the session, show the notes to the client, and invite discussion from the client about reactions to the notes. Presenters in this session will use organizational case examples to explain how significantly documentation time can be reduced, and how at the same time the therapeutic alliance with the client can be strengthened.

DAY 1

The National Behavioral Health Information Management Conference and Exposition

WEDNESDAY, April 26, 2017

2:00 PM – 3:15 PM

CONCURRENT SESSIONS, Continued

Emerging and ongoing data privacy and security challenges for behavioral health care in the evolving health care system. Carlsbad A/B

Adam Bullian, JD, Director, QIP Solutions

Jennifer Schwartz, JD, Attorney III Specialist, Department of State Hospitals and former Chief Counsel of CalOHII

Yun-kyung (Peggy) Lee, Esq., Deputy Regional Manager, Office of Civil Rights

MODERATOR: Thad Dickson, CEO, Xpio Health

A dynamic, interactive panel of privacy and security experts will overview several of the major challenges to complying with privacy and security regulations for behavioral health data. They will refer to elements of HIPAA, including the upcoming Phase 2 audits, and 42CFR.2, including the most recent SAMHSA revisions. They will address information exchange issues among mental health and substance use treatment providers with each other, with the broader health care system, and with other systems such as social services and criminal justice. They will also address issues emerging from the increasing use of mobile technologies for health care data and social media.

3:15 PM – 3:45 PM

BREAK AND EXHIBIT HALL OPEN

DAY 1

HANDOUTS ARE AVAILABLE AT:
<http://www.cibhs.org/conference/17th-annual-national-behavioral-health-information-management-conference-and-exposition>

WEDNESDAY, April 26, 2017

3:45 PM – 5:00 PM

GENERAL SESSION KEYNOTESunset Ballroom A/B

Consumer-driven use of technologies to enhance treatment and recovery: Mobile devices and portals to support use of social media, texting, apps, bots and more

Keris Jän Myrick, MBA, MS, Director, Office of Consumer Affairs, SAMHSA

John Torous, MD, Co-Director of Digital Psychiatry Program, Beth Israel Deaconess Medical Center/Harvard Medical School

MODERATOR: Thad Dickson, CEO, Xpio Health

Clients are adopting a wide range of technologies to enhance their treatment and recovery. In this session, presenters will summarize the range of technologies that consumers are using, including: texting, bots, apps, web-based portals, GPS-based risk alert systems, and social media. They will review many of the functions that consumers value through these technologies, such as appointment reminders, real time communication with clinicians, alerts to prompt positive and recovery-oriented self-talk, and more. Presenters will evaluate the promises and pitfalls of texting between clinicians and clients in a behavioral healthcare setting, including such services as group notifications and reminders, server-based warnings and alerts when forwarding missed client messages, and inclusion of text-based information sent by clients into their electronic records. Presenters will also evaluate the regulatory, technology and security implications of mobile communications, and in what situations such safeguards as encryption are needed.

SAMHSA enacts the first Revise of 42CFR.2: A look at the new regulations for privacy of substance use treatment data

Kimberly Johnson, PhD, MBA, Director, Center for Substance Abuse Treatment, SAMHSA and HIT Strategic Initiative Lead, SAMHSA

At the time of the 2017 conference, SAMHSA will have recently released its long-awaited revisions of the decades-old privacy regulations for substance use treatment data. While SAMHSA had previously issued new interpretations of the regulations to help address challenges in the evolving electronic era, this is the first actual set of revisions. The presenter will explain the major opportunities presented by electronic health record (EHR) systems for improved care coordination, several of the challenges that EHRs pose to client data privacy, and how 42CFR.2 regulations can impede care coordination. She will overview the recent changes made to the 42CFR.2 regulations that are intended to strike a new balance in protecting client data privacy while facilitating easier electronic health information exchange between those involved in clients’ treatments.

9:45 AM – 10:45 AM **GENERAL SESSION KEYNOTE**Sunset Ballroom A/B

Laying the groundwork for electronic consents to release information: Progress towards national standards and technology solutions

Suzanne Gonzales-Webb, CPhT, Co-Chair, HL7 Community-Based Collaborative Care Workgroup and Senior Security Analyst and Project Manager, Engility

Several federal agencies and national standard-setting organizations have launched initiatives to pilot electronic consent forms for client release of information. The presenter for this session will overview these policy, standard-setting and demonstration grant efforts by such organizations as ONC, SAMHSA and HL-7. She will describe the importance of setting such standards as record segmentation and data segmentation to provide the foundation for electronic consent forms that can specify limits on the type of data to be released, to whom it should be sent, and to whom it can be disclosed. She will also describe pilot tests of these forms and progress towards widely accepted solutions.

10:45 AM – 11:15 AM **BREAK AND EXHIBIT HALL OPEN**

DAY 2

THURSDAY, April 27, 2017

11:15 AM – 12:30 PM

CONCURRENT SESSIONS

Measuring access to care: Challenges for counties and treatment providers in managed systems of careCardiff

Don Kingdon, PhD, Principal, Behavioral Health Integration, Harbage Consulting
Stacy Kuwahara, LMFT, Behavioral Health and Recovery System Administrator, Managed Care and Quality Improvement Divisions, Kern County Mental Health
Dan Walters, Technology Services Manager, Kern County

State- and county-based behavioral health services are becoming managed care plans and organized delivery systems. This evolution brings with it definite benefits to the client, but also considerable new challenges to meet increased levels of responsibility and accountability. Presenters will describe the rationale and requirements for demonstrating timely access to services with data. They will describe the different ways of measuring access and how the results can be misleading. They will also describe the roles and responsibilities of the call centers, treatment providers, data analysts and system managers in entering, collecting, analyzing and reporting on the data. The presenters will provide case examples of how systems of care use these measures to identify subpopulations who are encountering more difficulties with access to care, and what can be done to improve access for those people.

**Continuum of Care Reform in California:
 How data sharing between child welfare, behavioral health and physical health care systems supports new treatment models for youth and their familiesDel Mar**

Alicia Sandoval, Chief, Child Welfare Data Analysis Bureau, California Department of Social Services
Katherine Elliott, PhD, MPH, Research Program Specialist, Child Welfare Data Analysis Bureau, CA Department of Social Services
Linette Scott, MD, MPH, Chief Medical Information Officer and Deputy Director of the Information Management Division, California Department of Health Care Services

MODERATOR: Lynn Thull, PhD, California Alliance of Child and Family Services (CACFS)

Federal, state and local agencies increasingly recognize the necessity of comprehensive care models for addressing the mental health treatment needs of children and their families. In California, counties are now required to provide Intensive Care Coordination and Intensive Home Based Services to children and their families who are Medi-Cal covered and meet medical necessity criteria for Specialty Mental Health Services. Presenters for this session will represent child welfare, behavioral health and physical health care perspectives to overview this initiative and the opportunities and challenges that it presents. They will explain the importance of data sharing across previously separated service systems to implement the care coordination requirements of the initiative. The presenters will also provide guidance with examples of how this data sharing can be accomplished while respecting HIPAA and other privacy regulations.

DAY 2

The National Behavioral Health Information Management Conference and Exposition

THURSDAY, April 27, 2017

11:15 AM – 12:30 PM

CONCURRENT SESSIONS, Continued

The present and future of Clinical Decision Support: Real world examples of automation and alerts to support enhanced patient safety and quality of care Solana

Virna Little, PsyD, MBA, Senior Vice President, Psychosocial Services/Community Affairs, The Institute for Family Health

Benjamin Clemens, LCSW, Director of Technology Implementation, The Institute for Family Health

Many counties and treatment provider organizations have selected their EHRs and have begun implementing their EHRs’ basic functionality. Having done so, they are ready to take advantage of some of the more advanced functionalities that EHRs can provide. The presenters for this session are thought-provoking and innovative leaders in health care informatics who will overview many of the most popular clinical decision support functionalities in EHRs, particularly those involving alerts for documentation compliance, links of assessment findings to treatment planning, and prompts for appropriate dosing levels of medications. The presenters will explain how to engage providers in maximum use of the clinical decision support system by striking a middle ground between too many and too few alerts. They will also explain how implementing a clinical decision support system can help meet Meaningful Use standards.

Year two of California’s 1115 Drug Medi-Cal Waiver pilot: How information technology and health information exchange are helping build an organized delivery system for treatment of substance use disorders Carlsbad A/B

David Mee Lee, MD, FASAM, Senior Vice President, The Change Companies

Rama Khalsa, PhD, Director, Drug MediCal EQRO, Behavioral Health Concepts

Michael Hutchinson, MFT, Division Director, Quality Improvement and Data Support/SUTS Division, Santa Clara County Health and Hospital System, Department of Behavioral Health Services

Many California counties have begun their system of care pilots to improve access, match clients to substance use disorder (SUD) treatment, incorporate evidence-based practices, coordinate care across other systems, and measure performance and outcomes. Presenters in this session will provide an overview of the Waiver, based upon criteria from the American Society of Addiction Medicine, and describe the important role of information systems in achieving the Waiver’s goals of person-centered care. They will include examples from actual implementations to illustrate how both electronic health record systems and health information exchange are making it possible to transform services from disconnected treatment programs into a unified system of care.

12:30 PM – 2:00 PM

LUNCH AND EXHIBIT HALL OPEN Grand Pacific Ballroom A/B

DAY 2

THURSDAY, April 27, 2017

2:00 PM – 3:15 PM

CONCURRENT SESSIONS

How to decide on what measures of quality care to use: An overview of nationally vetted measures and how to select from themCardiff

David Pating, MD, Chief of Addiction Medicine, Kaiser Permanente Medical Center San Francisco and Member, National Quality Foundation’s Behavioral Health Standing Committee
Vijay Ganju, PhD, CEO, Behavioral Health Knowledge Management

MODERATOR: Tom Trabin, PhD, MSM, Conference Chair

Health care reform has brought increased funding for services and, with it, increased accountability. Mental health and substance use program and system of care managers need to judiciously select a few of the best measures of access, quality of care, progress during treatment, and outcomes. Presenters for this session will provide an overview of the major national organizations who conduct a vetting process for measures and describe what that vetting process is like. They will describe how these vetting organizations communicate their findings to the field, where those findings can be easily found, and what some of the most widely used measures are. They will also explain what some of the criteria are that mental health and substance use policy makers and treatment managers are using to select from among these many measures.

Care coordination for clients under civil commitment or otherwise hospitalized for a serious mental illness: Making data exchange easier between behavioral health, public guardian, and other involved servicesSolana

Lyman Dennis, MBA, PhD, Executive Director, ConnectHealthcare
Joshua Morgan, PsyD, Chief of Behavioral Health Informatics, San Bernardino County
Jessica Pentland, JD, Deputy County Counsel, County of Santa Clara

Under Medi-Cal managed care, many health plans have made significant progress in developing effective models of person-centered planning and support to improve care for clients who periodically use intensive physical and behavioral health services without experiencing long-term positive outcomes. Among that client group are those under civil commitment or who have otherwise been hospitalized periodically for serious mental illnesses. Presenters for this session will describe some of the care management approaches in use to enhance treatment effectiveness, care coordination and client outcomes. They will describe the types of data exchange necessary between different providers, public guardian, and other service agencies to facilitate effective care coordination for these clients, and the challenges to doing so posed by some privacy regulations such as California’s Lanterman Petris Short (LPS) Act privacy procedures. Presenters will also describe proposals currently under consideration for minor changes to the LPS Act and the California Medical Information Act that could help improve information exchange and support care coordination for these clients.

DAY 2

THURSDAY, April 27, 2017

2:00 PM – 3:15 PM

CONCURRENT SESSIONS, Continued

Extending the connectivity to EHRs beyond the desktop via mobile and web based technologies.

Carlsbad A/B

Robin Goodell, LCSW, Behavioral Health and Recovery Services Admin; Crisis Services, Kern County Mental Health

Patrick Lowe, Software Support Engineer, KVC Health Systems

Mark Chambless, Senior Deputy, Kern County Sheriff’s Office (KCSO)

MODERATOR: Marlene Maheu, PhD, Coalition for Technology and Behavioral Science (CTiBS), TeleMental Health Institute, Inc.

Although EHRs are maturing and stabilizing in desktop workstations, clinicians working in the field need remote access to clinical information through mobile and web based technologies. Presenters in this session will explore the creative and innovative ways organizations are extending their EHRs into the field for clinical use through mobile and web-based technologies such as smart phones, tablets, and laptops. Presenters will also describe the accompanying technical and security challenges to these remote devices and additional challenges to Bring Your Own Devices (BYOD). They will offer solutions and best standards of practice for communicating Protected Health Information (PHI) via remote devices including security measures that can be applied.

Substance use instruments for screening, assessment and measuring outcomes: An overview of approaches

Del Mar

Darren Urada, PhD, Associate Research Psychologist, UCLA Integrated Substance Abuse Programs

Julie Seitz, LADC, LSW, Clinical Director, Center for Alcohol and Drug Treatment

MODERATOR: Rama Khalsa, PhD, Director, Drug MediCal EQRO, Behavioral Health Concepts

Health care reform and related initiatives in the public sector are bringing more funding for substance use treatment. Along with it come increased accountability for conducting thorough assessments, matching clients to appropriate treatment, adjusting treatment to the changing needs of the client, and measuring outcomes. Presenters for this session will review several of the most widely used screening and assessment instruments that can also assist providers in treatment planning. They will review the most widely used measures of client perception of care and client progress in treatment. The presenters will explain how these measures can be administered most usefully to inform and guide treatment at the outset and on an ongoing basis throughout treatment.

3:15 PM – 3:30 PM

BREAK

DAY 2

The National Behavioral Health Information Management Conference and Exposition

THURSDAY, April 27, 2017

3:30 PM

CLOSING GENERAL SESSIONSunset Ballroom A/B

California’s Medi-Cal Waiver Whole Person Care Initiative: How information technology and HIE are being incentivized to support care coordination

Clemens Hong, MD, MPH, Director, Whole Person Care, L.A. County Department of Health Services

Gerald Huber, MSW, MPH, MPA, Director of Health and Social Services, Solano County Health & Social Services

MODERATOR: Tom Trabin, PhD, MSM, Conference Chair

The Whole Person Care Initiative is a significant 5-year program recently begun under California’s Medi-Cal 2020 Waiver to test locally-based initiatives that will coordinate physical health, behavioral health, social services and housing for vulnerable Medi-Cal beneficiaries who periodically use high cost services from multiple health care systems without long-term positive outcomes. Presenters will describe the initiative and how it provides funding for health information exchange and the underlayment of information technologies to support that exchange. They will describe the plans and beginning implementation efforts in several counties that were granted Whole Person Care pilot awards.

4:30 PM

CONFERENCE ADJOURNS

DAY 2

THANK YOU TO OUR EXHIBITING SPONSORS

The Echo Group
www.echoman.com

Booth #201 / #300

The Echo Group's exclusive EHR/RCO Partner Program eliminates upfront costs, fees, and lost revenue from the EHR selection equation. Echo's implementation and Revenue Cycle Optimization services have agencies up and billing within 90 days. Echo offers the most intuitive and flexible EHR, billing software, managed care, IT, and Revenue Cycle Optimization services available for behavioral healthcare.

Exym, Inc.
www.exym.com

Booth #205

With more than a decade of experience and over 50 customers in California, Exym is the best partner to help you navigate the new technical requirements for healthcare. No EHR offers more reliable electronic claims and EDI transactions than Exym. Best of all, your clinicians will love it!

American Society of Addiction Medicine
www.ASAM.org

Booth # 103

ASAM is a specialty membership organization dedicated to increasing access and improving the quality of addiction treatment. Learn how ASAM is helping support the implementation of the 1115 Waiver through our standardized ASAM Criteria assessment products: CONTINUUM™ and CO-Triage™.

THANK YOU TO OUR OTHER EXHIBITORS

Clinivate, LLC
www.clinivate.com

Booth #203

Clinivate offers a comprehensive, flexible and easy-to-use web-based EHR system for behavioral healthcare treatment organizations. Clinitrak® features a balanced blend of extensive clinical knowledge coupled with superior technical expertise. Clinivate's consultative approach to providing customer solutions is the foundation for delivering on-time implementations, ongoing training and high-touch customer/user support.

Core Solutions, Inc.
www.coresolutionsinc.com

Booth #303

Core Solutions is the progressive leader in transforming the health and human services experience for behavioral health providers, consumers and state agencies. Core's integrated EHR software, Cx360, offers advanced population health and information management to achieve improved outcomes and relationships between providers, consumers and payers.

Credible Behavioral Health
www.credibleinc.com

Booth #200 / #202

Credible is committed to improving the quality of care and lives in behavioral health for clients, families, providers, and management. A market leader in Behavioral Health Enterprise Software, Credible has partnered with over 315 Partner Agencies in 31 states and the District of Columbia.

eCenter Research, Inc.
www.elnsight.net

Booth #105

eBHS is a flexible data platform that enables custom development to support unique organizational needs for data gathering, data management, and organizational work flow application development, individual and aggregate statistical reports with dynamic graphing and custom reporting.

FEi Systems
www.feisystems.com

Booth #101

FEi Systems is a leading provider of e-health solutions in the behavioral health market supporting California's counties in CalOMS data collection, PEI, & Drug Medi-Cal billing. FEI offers solutions to support California's 1115 Waiver including the ASAM CONTINUUM™ Assessment, Triage Screener, & a Countywide Waitlist to manage timely access to care. Other solutions include an industry leading EHR & SAMHA's Consent2Share application which allows data sharing through an HIE.

Genoa, a QoL Healthcare Company
www.genoa-qol.com

Booth #404

Genoa, a QoL Healthcare Company is the nation's market-leading provider of pharmacy services dedicated to the behavioral health community and those affiliated with managing the cost and quality of their care. For more information about our on-site pharmacy models, please visit us at: www.genoa-qol.com.

Kings View
www.kingsview.org

Booth #204

Kings View has addressed the unique behavioral and social needs of the behaviorally ill for the past 65 years and is recognized as the industry leader for innovation and collaboration. Kings View offers six service lines: Behavioral Health, TelePsychiatry, Substance Abuse, Intellectually Challenged Programs, Youth Empowerment, and Information Systems.

Netsmart
www.ntst.com

Booth #301 / #400

Netsmart is the largest technology provider connecting behavioral health and post-acute care with all of healthcare. As a leader in healthcare, we're committed to working alongside our clients to innovate the most intuitive technology possible. To learn more about how Netsmart is changing the face of healthcare today, visit www.ntst.com.

Rural Health Telecom
www.telequality.com

Booth #402

TeleQuality Communications and Rural Health Telecom design and supply organizations with cost-effective, network solutions to connect multiple business locations to each other, business partners and the Internet. Our technology solutions enable healthcare providers to take advantage of emerging healthcare technologies that increase access and lower the cost of health care.

Streamline Healthcare Solutions
www.streamlinehealthcare.com

Booth #305

Streamline Healthcare Solutions has been providing EHR software solutions to behavioral healthcare organizations since 2003. Our meaningful use certified system, SmartCareEHR™, is a web-based, enterprise application built for the delivery, management, and coordination of healthcare services. Our solution is equipped to evolve as business needs develop.

Valant
www.Valant.com

Booth # 302

Valant was founded in 2005 to provide behavioral health providers with EHR technology to streamline administration and empower what's most important: improving outcomes. Our completely new platform was born from modern, cloud architecture including an elastic and infinitely scalable data model, mobile app-inspired user experience, and an on-demand ability to respond to change without additional investment in time, money, or training.

Welligent
www.welligent.com

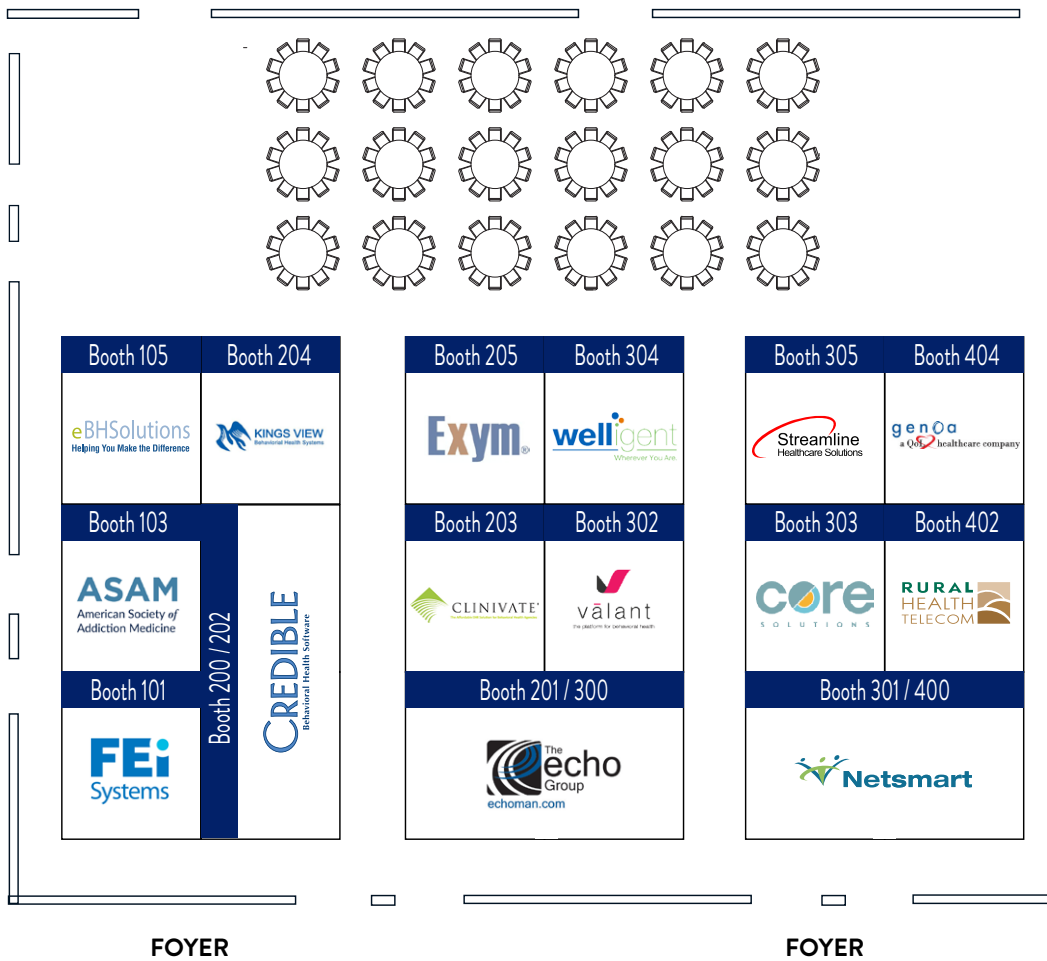

Booth #304

Welligent is your technology partner for cloud EHR and mobile apps. Welligent offers appointment scheduling and reminders, documentation, supervision tools, billing management, dashboard reporting and more. Welligent Express, our mobile EHR, allows you to manage your caseload, schedule and documentation on the go—wherever you are. Find out why providers nationwide are saying, "We Chose Welligent!"

WELCOME TO THE CIBHS YAPP APP FOR THE 2017 INFORMATION MANAGEMENT CONFERENCE!

HOW CAN I VIEW THE CIBHS YAPP APP ON MY PHONE OR TABLET?

SYSTEM REQUIREMENTS

YAPP IS CURRENTLY ONLY DEVELOPED FOR IOS AND ANDROID DEVICES. THIS INCLUDES IPHONES, IPOD TOUCH DEVICES, IPADS, ANDROID PHONES AND ANDROID TABLETS. THERE HAS BEEN LITTLE DEMAND FOR YAPP FOR BLACKBERRY AND WINDOWS PHONE.

For those who don't have an iOS or Android device just click on this link in your computer's browser, <http://my.yapp.us/Z3HNC4>, and tap the cover. This should open the app on your computer screen. Your navigation is at the bottom of the app showing on your computer screen

Downloading the App

Click [here](#) to view a Vimeo video on how to download an app on iOS for first time users. There are other instructional videos in this link as well.

CIBHS has invited you to view the CIBHBS Yapp App. Your invitation is in this URL: <http://my.yapp.us/Z3HNC4>

If you received the link:

Tap or input the URL from your iOS or Android device.

You'll be directed to your app store to download the Yapp container app, if you don't already have it on your device. If you do not already have it on your device, you will need an account to download the Yapp container. The account is an Apple App Store account or a Google Play Store Account.

Once Yapp is downloaded, open it. Tap the "Download An Existing App" button and the app will install automatically.

If you are downloading from a computer via the CIBHS website:

If you visit the link on a computer, we've still got you covered. Go to this URL <http://www.cibhs.org/cibhs-apps>. and click on the app post. Once open, you can either type in a phone number and the app invite will be sent directly to that phone, or you can scan the app's QR code with their smartphone. (If there is a problem, make sure there isn't a "www." in front of the "my.yapp.us" portion of the link.)

Opening the App

Once the CIBHS Yapp is downloaded, tap the cover, and wait for the cover to open and turn. You may receive occasional updates to your CIBHS Yapp. You will be asked to load the update when this occurs.

Viewing the Content

Can I view the CIBHS Yapp App on a computer only?

For those who don't have an iOS or Android device just click on this link in your browser, <http://my.yapp.us/Z3HNC4>, and tap the cover. This should open the app.

Navigation

Your navigation is at the bottom of the app showing on your computer screen or iPhone screen. Android screens may have the menu to left showing after you swipe the screen to the right.

My Schedule

You can create and view personalized schedules via "My Schedule". You can create and see your schedule by tapping on the My Schedule icon on the top right of any Schedule or Session page.

You may view a training video on "My Schedule" at <https://vimeo.com/153932275>

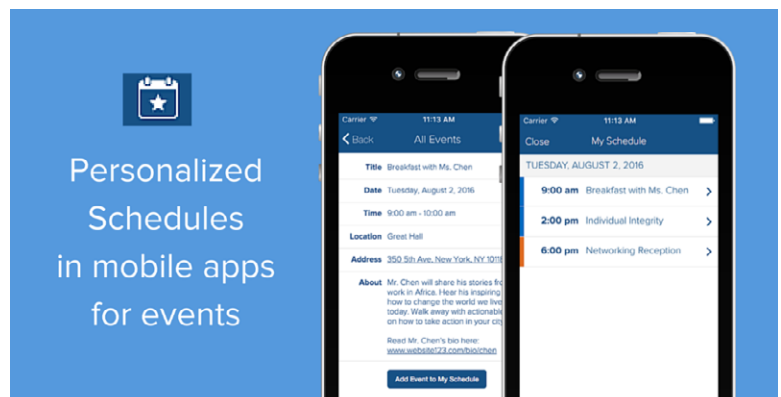

Social Media

This CIBHS Yapp has several social media functions:

U CAN MESSAGE ALL: In this page, you and anyone who has downloaded the app can post pictures and comments from your phones or tablets.

TWITTER: Using the conference's hashtag — #InfoM17 — we will be posting images and comments related to the conference's content throughout the event. We encourage you to do the same!

Have fun!
