California's implementation of the federal Section 1115 Waiver for Drug Medi-Cal provides additional federal and state funding for SUD treatment, and supports an organized delivery system that ensures access to a full continuum of care from assessment and early intervention to recovery supports. One of the changes in DMC financing has been the transition from a county of service to a county of responsibility model for adjudicating DMC claims. We will discuss the financial implications of this transition for counties given the responsibility of every county to ensure that all of its residents have access to the medically-necessary DMC services to which they are entitled.
